Welcome to CAMP CHOICE

CAMP CHOICE – Education Camp at the Humber Institute of Technology & Advanced Learning was developed specifically to introduce grade 6, 7 & 8 students to new levels of learning and career options while providing an opportunity to fully experience life on a college campus.

The **3-Day Residential** adventure consists of 2 nights accommodations in our Student Residence with a complete meal plan. Students will participate in a variety of informative, hands-on workshops that require thought and teamwork, and are professionally designed with technology in mind. Each is delivered by knowledgeable camp staff in specialized learning labs; all with one common thread – fun! Rounding out the adventure and completing your college experience are opportunities to socialize, and meet new friends. Just like college!

Encourage higher learning with our **1-Day Mini-Camp** adventure. Smaller in scale but same in design as the 3-day, this program includes interactive workshops, a mini-meal plan and fun packed activities to provide students with a sneak peak into college life.

No matter which adventure you choose, your CAMP CHOICE counselors will be there to ensure you get the most from your college experience.
